SECTION 4. FIRST AID MEASURES**4.1. Description of first aid measures**General advice

Avoid contact with skin, eyes and clothing. Avoid breathing vapours or mists. Get medical attention immediately if symptoms occur. Cyanoacrylates glue skin and eyes in seconds. Bathe in warm water. Do not try to force tissue apart.

Eye Contact

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation develops and persists. Eyelid bonding: see a doctor. Do not force apart. Do not peel solidified product off the eyes.

Skin Contact

Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes. Get medical attention if irritation develops and persists. Care pulling bonded skin apart. Soak in warm water and gently, slowly ease apart.

Ingestion

Rinse mouth with water. Do NOT induce vomiting. If swallowed, seek medical advice immediately and show this container or label. Gently wipe or rinse the inside of the mouth with water. Rapid polymerisation lowers likelihood of swallowing. Saliva aids separation of solidified product.

Inhalation

Remove from the area to fresh air. Seek medical attention if respiratory irritation develops or if breathing becomes difficult.

4.2. Most important symptoms and effects, both acute and delayedSensitisation

May cause sensitisation of susceptible persons.

Eye contact

May cause irritation as itching and redness.

Skin contact

May cause irritation as itching or redness.

Ingestion

May cause gastrointestinal irritation seen as nausea, vomiting and diarrhoea. Ingestion of larger amounts may cause effects to the central nervous system (e.g. dizziness, headache).

Inhalation

Inhalation of mists may result in irritation to the respiratory tract. May cause headaches, dizziness, drowsiness and nausea.

4.3. Indication of any immediate medical attention and special treatment neededNotes to physician

Treat Symptomatically.
